

SMT. VIMLADEVI KHYALILALJI VAGARECHA COLLEGE OF NURSING EDUCATION

Shaping the Future of Healthcare

Best Practices:

Teaching Methods:

- Various teaching learning methods are adopted like innovative teaching methods.
- All classrooms are well equipped with required teaching materials, we have well equipped laboratories.
- We teach certain skills like Heart sound auscultation, Lung sound auscultation, , RT insertion, Intubations, BLS, ACLS with highly digitally equipped simulators in the advance skill labs. Lectures are taken by the experts.
- In clinical areas for teaching Nursing rounds, Bedside clinics, patient case based scenarios are used.
- For the assessment of their practicals this year onwards we have planned for calling external examiners for conducting term practical examinations as well.

Learning resources:

- Students have access to learning material available in library. They also have access to e library via our website.
- They can even access MUHS Digital Library, Knimbus MUHS, and MUHS thesis from website.
- They can also access semantic scholar, pub med and Open educational resources from the college website itself.

Student support:

- Students have guidance and counselling services available. The records of mentorship are maintained by the teachers.
- There are suggestion boxes and complaint boxes are put in the college premises where students can provide valuable suggestions.
- We have every term feedback system for which link is shared with the student and data is analyzed. Prompt feedback to students and staff is provided and students are encouraged to develop reciprocity and cooperation.
- For female students we do have sanitary pad vending machines.
- College is planning to start Book Bank scheme at college level.
